ZIELONY SZKOLNY BUDŻET PARTYCYPACYJNY

Do kogo jest skierowany Eko Budżet?

Projekty mogą zgłaszać uczniowie klas 4–8 (uczniowie klas 1–3 będą mogli za pomocą rysunków przedstawić swoje pomysły starszym kolegom, aby uwzględnili oni również ich potrzeby w swoich projektach).

STARACHOWICE
POWERING GROWTH

Project Green Participatory “Eco Budget” for Primary Schools in Starachowice

– engagement of the Youth City Council

1. The Youth City Council developed the idea and principles of the project;
2. The Youth City Council carried out the marketing campaign;
3. Representatives of the Youth City Council selected projects that were put to a vote in primary schools;
4. The Youth City Council conducted a vote in primary schools and determined the results of the vote;
5. The Youth City Council participated in a press conference summarizing the project of Green Participatory “Eco Budget” for Primary Schools.

Project Green Participatory “Eco Budget” – coordination teams

1. Municipal Coordination Team:

- three representatives from the Municipal Office,
- three councillors from the Youth City Council,
- one representative from each school.

2. School Coordination Teams:

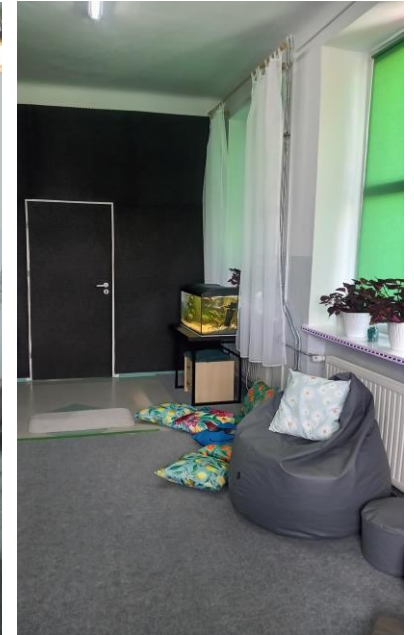

- the principal,
- a teacher appointed by the principal,
- a student union representative,
- Youth City Council representative.

Green Participatory “Eco Budget” Project - implementation of the green ideas

1. Primary School no.1:

- „Quiet Room” – Due to the noise in the school corridors, the project involved creating a unique room. The room is a green zone in the school where students can relax, study and spend time in a good atmosphere.
- „Eco Wall” – The project involved creating a green wall of moss in the school. Moss filters air and regulates temperature. It is also calming and has a beneficial effect on health.

Green Participatory "Eco Budget" Project - implementation of the green ideas

1. Primary School no.9:

- "Relaxation corner for book lovers" - The project involved creating a place for reading books. An eco-wall, i.e., a shelf for books and flowers, was created next to it. Next to it is an armchair made of euro pallets.
- "Time to relax in a green corner" - The project involved creating an eco-educational corner. It is an eco-corner surrounded by plants. Greenery has a calming and soothing effect on students. This activity introduces the school community to systematic work on plant care.

Green Participatory "Eco Budget" Project - implementation of the green ideas

1. Primary School no.12:

- "Green Point" - The project involved creating bicycle racks and benches. Students can leave their bicycles in a safe place. This action encourages active use of this means of transport and reduces exhaust emissions in the city.
- "Healthy classroom for every student" - The project involved renovating a classroom used by all students in grades 4-8. New environmentally safe lamps, ecological blinds, plants and sorting bins were purchased.

Green Participatory "Eco Budget" Project - implementation of the green ideas

1. Primary School no.13:

- "Green spot" - The project involved creating a place to relax. Most of the furniture is green, and the space is decorated with various plants.
- "Relaxation corner and safe break time" - The project involved creating a special green space with many greens and flowers there. This place is for students who want to relax and escape the noise during breaks between lessons.

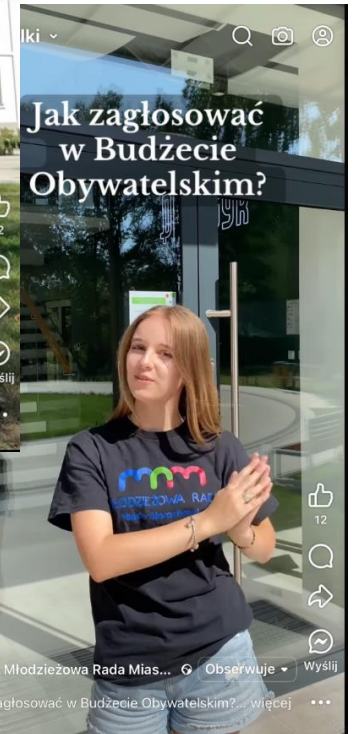

Green Participatory “Eco Budget” Project

- implementation of the green ideas

- outcomes of the project

1. Increasing awareness of young people about the idea of civil society;
2. Learning the principles of functioning of the civic budget as a tool of civil society;
3. Increasing awareness of the existence of the Youth City Council among young people;
4. Encouraging young people to participate in the Youth City Council;
5. Increasing knowledge of young people about entrepreneurship.
